

Western Weather Group's Lodi Wine Country Frost Forecast

Meteorologist, Matt Wanink

Monday April 30, 2018 issued 2:00 pm

Highlights: Warmer weather returns over the next few days. Onshore winds at times tonight (especially along the westside) keeping temps more mild. Highs in the 80s late this week with light winds.

Frost Discussion: A weak upper level disturbance sliding down the coast today and tonight will help to keep onshore flow in place. With a warmer air mass and occasional winds, overnight lows will be more mild with most areas dropping into the middle 40s (windier spots may only drop into the upper 40s). Tomorrow will end up being a typical breezy north wind spring day across the Lodi area with highs in the middle 70s. North winds will die down overnight and into Wednesday. High pressure will then have a good grasp over California with dry/warm weather expected through the weekend and likely into next week.

NOTE: This will be the last afternoon frost forecast of the 2018 season

LODI AVA FORECAST MINIMUM TEMPERATURES

Forecast minimums for key regional locations	Most Likely Minimum for tonight	Worst Case Scenario Clear & Calm	Afternoon Observations & 24hr change		Today's AM Minimum Temperature	Change from previous nights Min Temp	Rainfall Today So Far
			Temperature	Dew Pt			
AVA's		10%
