

# Western Weather Group's Paso Robles Agricultural Forecast

Western Weather Group makes every effort to provide accurate forecasting based on various sources of information available at the time of each forecast. However, neither the PRWCA nor Western Weather Group make any expressed or implied warranties or affirmations that the weather will occur as forecast.

State-of-the-art soil moisture monitoring systems are now available through WWG

Issued: Saturday, March 14, 2026 at 7:39 AM

**HIGHLIGHTS:** Expect well-above average high temperatures today. Possible **record-breaking highs** are likely for the foreseeable future, especially next week.

Forecast Specifics	Weather	Max/Min	Dew Pts	POPs	Amounts	Winds
<b>Today</b>	(inland) Mostly Sunny (coastal)	<b>76-83</b> <b>72-79</b>	37-47	0%	none	NE-NW 5-15
<b>Tonight</b>	(inland) Mostly Clear (coastal)	36-41 40-46	31-41	0%	none	NE-Var 0-10
<b>Sunday</b>	(inland) High Clouds (coastal)	<b>77-84</b> <b>74-80</b>	39-49	0%	none	NE-NW 5-15

\*(Coastal - west of HWY101, Inland - east of HWY101)

**Forecast Discussion:** High Pressure returns today and maintains unseasonable warm temperatures and dry weather. Daytime highs in the region are anticipated to reach into the upper 70s, possibly even low 80s in the warmest locations. Expect light north winds today; turning variable overnight. Tomorrow anticipate the north winds to return and temperatures to warm again possibly reaching **record-breaking values** in the low to mid-80s.

**Extended Forecast Discussion:** The high pressure ridge will strengthen over California and will become the dominant synoptic feature for the extended forecast. In turn, the trend of unseasonable warm temperatures will continue. Looking ahead to the next work week daytime highs are expected to continue to rise throughout the week and will likely lead to **widespread record-breaking high** possibilities each day. Select locations may likely see temperatures upwards of 95 degrees by mid week. Starting Monday winds will decrease in strength and will stay light for the remainder of the week. By the following weekend models show the possibility of a trough pushing into the region, which would likely allow for a cooling trend to begin.

Meteorologist, Hanna Medler
