Napa County Frost Forecast

www.westernwx.com/napa

This forecast is brought to you by the Napa Valley Vintners

Monday May 15, 2023 issued 3:00pm

HIGHLIGHTS: Mild low temperatures expected again tonight, ranging from the mid 40s to low 50s. Similar conditions likely persist through the rest of this week.

Frost Discussion: Temperatures are similar to slightly warmer than yesterday's in most locations this afternoon with light onshore flow. Onshore flow eases tonight, while dew points remain elevated. Low temperatures likely remain similar to slightly warmer relative to last night's. Mild overnight lows are then expected to continue through the rest of this week.

*****NOTE: This will be the final spring frost forecast of 2023*****
